

IN THE RED.

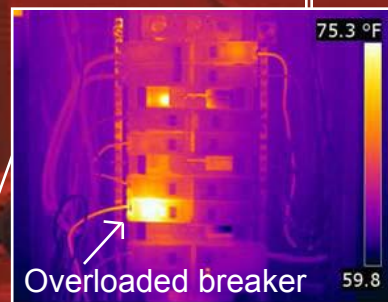

Motor on equipment

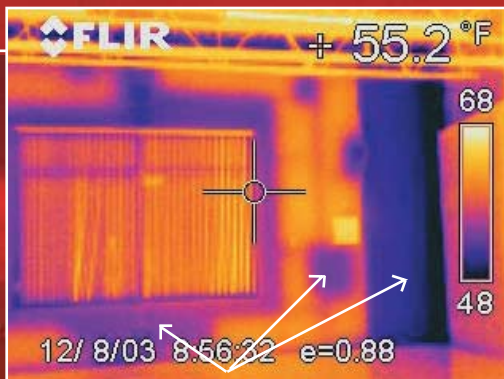

Water under roofing membrane

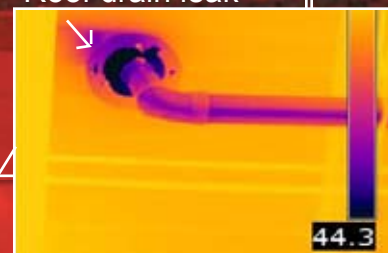

Transformer

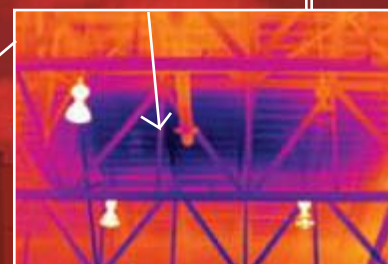

Overloaded breaker

Missing insulation in pre-cast panels

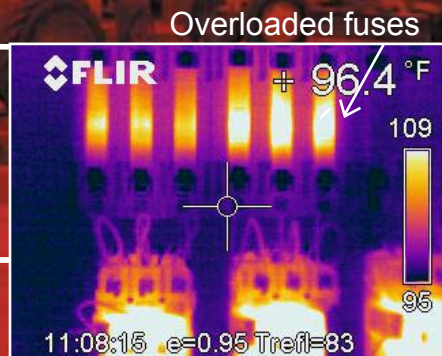

Roof drain leak

Roof saturated with moisture

**WANT TO REDUCE ENERGY,
INSURANCE & MAINTENANCE COSTS?**

Overloaded fuses

Want to Reduce Energy, Maintenance & Insurance Costs?

Imagine the potential savings...

- Increasing the energy efficiency of your building
- Pinpointing the location of water infiltration
- Easily spotting overloaded electrical panels, loose connections, and damaged wires
- Reducing insurance costs by fulfilling the requirements of the infrared electrical inspection
- Predicting when your equipment is on the verge of breaking down
- Significantly decreasing the down time of your production line
- Repairing only sections of your roof without replacing it entirely
- Locating leaks in radiant heating and pipes
- Knowing where invisible, unsafe conditions exist

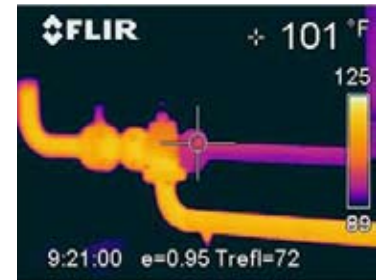

Finding problems fast & easy.

Why gamble? In very short order, our certified infrared inspectors can thermographically scan your site to identify and document problems for remediation. You have the potential to save significant amounts of money in energy, maintenance, and insurance costs. After all, do you actually think these costs will decrease anytime soon? Not likely. **Call Precision at 815-717-9083 today, and start saving money.**

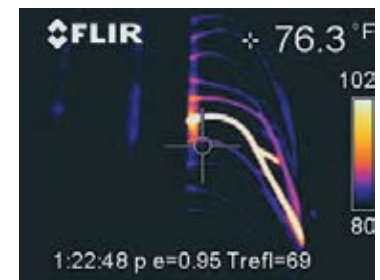

**Besides Infrared, we have a vast array of tools to help you find whatever you are looking for non-destructively*

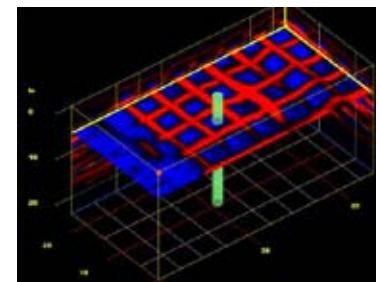

Cold air infiltration

Closed steam pipe valve

Loose connection on breaker
